

**Extra Virgin Olive Oil  
Pure Body Soap**

## Extra Virgin Olive Oil Pure Soap

My extra virgin olive oil is blended with palm kernel and coconut oil then stirred in the traditional cold process manner to form soap. The soap is poured into molds and insulated for three days. The bars are cut seven days after removing from the mold and allowed to cure for four weeks to harden.

Olive Diva extra virgin olive oil soap is produced from the finest first cold pressed Italian olives. Most olive oil soap makers use a lower grade and/or olive pumice that has been forced out with heat or added pressure. I believe this destroys some of the beneficial qualities of the oil.

**80% Extra Virgin Olive Oil Body Soap, *Unscented***

Rich, full lather and naturally pure. Ultra Radiant!

**5 oz. bar \$ 12**

Olive Oil is known for its moisturizing qualities and is one of the only natural materials that mimics the skins natural oils.
